Subject: Upgrade EZserver Linux Script

To fix checkezserver.sh using wget command bug, so you need to follow the below steps to update scripts:

- **cd ezserver_prof**
- **mv auto_ezserver.sh auto_ezserver.sh_old**
- **mv checkezserver.sh checkezserver.sh_old**
- upload **linux_script.tar** into **ezserver_prof folder**
- **tar xfvz linux_script.tar**
- remove "***/3 * * * * root /root/ezserver_prof/checkezserver.sh**" line in **/etc/crontab**
- if your ezserver folder is **/root/ezserver_prof**
  - ◆ check the first line of monitor.sh is same as below
    - ● **export EZSERVER_DIR="/root/ezserver_prof"**
  - ◆ auto start ezserver when linux is booting
    - ● add **./root/ezserver_prof/monitor.sh** in **/etc/rc.local**
- if your ezserver folder is **/home/ezserver_prof**
  - ◆ check the first line of monitor.sh is same as below
    - ● **export EZSERVER_DIR="/home/ezserver_prof"**
  - ◆ auto start ezserver when linux is booting
    - ● add **./home/ezserver_prof/monitor.sh** in **/etc/rc.local**
- add "**fs.file-max = 65536**" in **/etc/sysctl.conf**
- **sysctl -p**
- start ezserver by **./start.sh**
- shutdown ezserver by **./shutdown.sh**
- **ezserver_prof/log/closelog.txt** records ezserver closed time.
