

# Ezserver WebChain

Enhance Your Website

Cloud Software for DDoS and Zero-Buffer Streaming

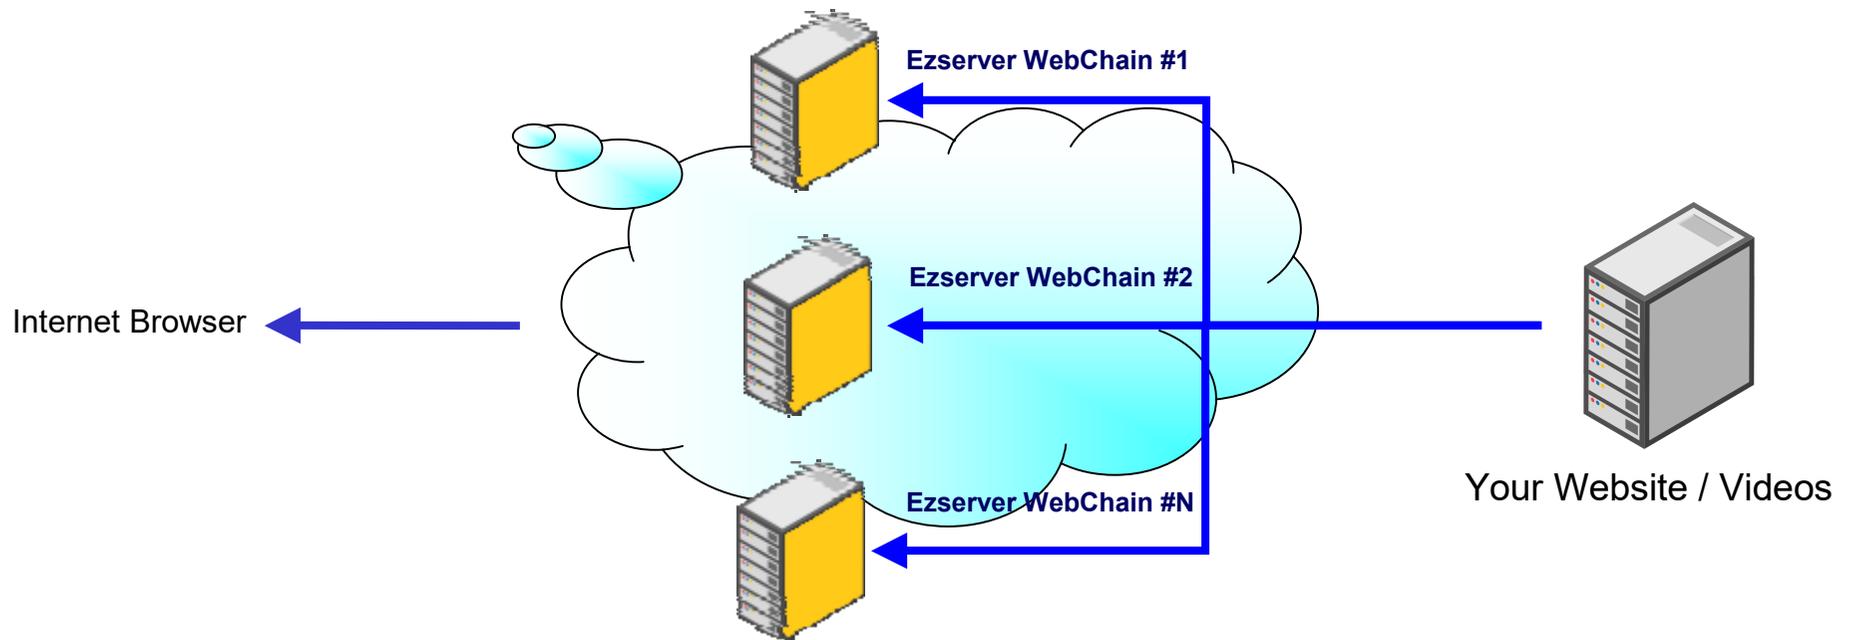

# Introduction

---

- A cloud software for WebPages and video streaming, integrates decentralization technology to establish your private cloud infrastructure, reducing dependence on platforms like YouTube and CDNs such as Cloudflare.
- It defends against DDoS attacks and offers zero-buffering video streaming, ensuring uninterrupted service.

# Ezserver WebChain

---

**Enhance Your Website for DDoS Protection and Zero-Buffer Streaming**

# 1<sup>st</sup> step: Rent Servers

---

- Rent above 5 tiny servers
  - cost \$1.0~\$5.0 / month (per server)
- Select one for master server
- Install Ezserver WebChain into all servers

## 2<sup>nd</sup> step Master Server

---

- Click Management:Setting
- Enable Main/Slave Node
- Set Control port: 17100 (default)
- Set Group ID: 18000(default)
- Restart Server (./restart.sh in ssh console)

Main / Slave Node

Control port

Group ID

## 3<sup>rd</sup> step: Slave Server

---

- Click Management:Setting
- Disable Main/Slave Node
- Set Master Domain name
- Set Master Control port: 17100
- Set Group ID same as Master Server
- Restart Server (./restart.sh in ssh console)

Main / Slave Node

Main Node Domain Name / IP  Group ID

Main Control port

## 4<sup>th</sup> step: Server Verification

- Login Master Panel
- Click Connection:Manage WebChain
- Check WebChain List

WebChain List					
No.	Type	IP	Region	Group ID	
1	Master WebChain	51.75.72.169	Europe	18000	
2	Slave WebChain	51.75.72.168	Europe	18000	
3	Slave WebChain	51.75.72.167	Europe	18000	

Showing 1 to 3 of 3 WebChains

## 5<sup>th</sup> step: DNS with WebChain IP

---

- Go to your DNS register
- Set All WebChain IP for your DNS name
