## 35. Restore old Setting to New version

If an administrator wants to install the newest version of ezserver prof with the setting of current version, he can follow the below steps :

- o   shutdown ezserver
- o   "**./backup_setting.sh**" to backup current setting to **ezserver_backup_setting.tar**
- o   install the newest version of ezserver prof.
- o   copy **ezserver_backup_setting.tar** to the newest folder
- o   "**./restore_setting.sh**" to restore setting from **ezserver_backup_setting.tar**
- o   restart ezserver
