

## 62. Multicast Input from Multiple Network cards

When a server has 2 network cards, you can set the 2<sup>nd</sup> card for multicast input from an encoder. Please follow the below steps:

3. Click More icon of the channel as below:

4. select one IP for multicast stream in the same LAN.
5. login panel to set **UDP Multicast URL** in channels.

For example:

An encoder can stream multicast videos by 224.1.1.1:9001, 224.1.1.2:9001 and 224.1.1.3:9001 to the LAN with the 2<sup>nd</sup> card.

Channel	Channel Name	Media Source
1	Local Stream 1	udp://224.1.1.1:9001
2	Local Stream 2	udp://224.1.1.2:9001
3	Local Stream 3	udp://224.1.1.3:9001
